ALL-MECHANICAL DESIGN

This design reduces noise and maintenance while providing a chemically clean workplace.

Top mounted drive system allows for a smaller footprint than other styles of lifts.

- Freight
- Manufacturing
- Warehousing
- Distribution
- Military
- Government
- Hotels/Lodging
- Virtually Unlimited

Note: To comply with ANSI/ASME B20.1 standard, proper guarding on all accessible sides must be in place during operation. Material Lifts are not subject to elevator codes as they are designed for material lifting only. No personnel are permitted to ride on any vertical lift. The following items are to be supplied by others and are not included with the vertical lift: (1) wall and floor hardware to secure the lift to the walls and floors, (2) external electrical wiring which is to be performed by a qualified electrician to local and national codes, (3) the conduit and disconnect switch that is required to connect our control panel and (4) upper and lower level thresholds.
